

AIR REFRESHER

Manual

Health promise starts from here

Function :

a. Applying the anion technology:

Strong purifying for air, removing the smoke; dust; smell; bacterium and other harmful matter.

b. Producing the active oxygen:

The anion can release the negative charge from oxygen element, make it more active, so anion can increase the oxygen density 20% and remove the CO₂ 15% to people.

c. Broad spectrum anti-bacterium and strong effect of ozone:

The ozone can kill bacterium, sterilization, and restored to be oxygen, no pollution again, the chemicals can't reach the effect as the ozone.

d. Effective anti-air condition disease:

The anion can further metabolism, separate bacterium, remove smoke and dust, keep the air more clear, remit the tired feeling, anti-air condition disease. The anion also can better physical response, and loose the function of mesh sebaceous glands, enhancing the physical immunity.

e. Protecting eyesight and refreshing spirit:

The negative ion can be connected with positive ion from LCD to be neutralized. Then reducing the radiation from LCD and protecting your eyesight.

f. Better lungs working:

Breathing the negative ion, the lungs can be increased oxygen 20%, eliminating CO₂ 15% to further blood circulation in body, and better lungs working.

g. More suitable in personal space:

Beauty shell, more mixed together with cars, show the original meanings for cars culture. And mixing with personal seeking to modern office environment, show your special taste.

Parameter:

Item	AIR REFRESHER
Model	DY13A
Color	blue,silver,gold,red,black,green
Voltage	DC-12V
Current	$\leq 400\text{mA}$
Power	$< 5\text{W}$
Negative ion density	$>1*10^6\text{pcs/cm}^3$
Ozone density	$>5\text{mg/h}$
Product weight	170g
Box size	120*90*176(mm)

Operating instructions:

After connecting the power, press the “ion” button, the green light will be opened, anion will work. Press “O3” button, the red light will be opened, ozone will work. Ozone work mode, convert to negative ion mode automatically after about 15 minutes.

Warning!

Do not touch the discharge ends with high voltage of the anion and ozone items by hands or any kind of metal in order to prevent electric shock.
